HALYARD®

BORDERED SILICONE HEEL DRESSING

Product Description

HALYARD* Bordered Silicone Foam Heel Dressings are sterile, dressings made with a superabsorbent pad, protective film backing, gentle silicone adhesive and secure border specifically designed to fit the heel and foot. The dressings are used to protect and absorb exudate from the wound, which facilitates a moist wound healing environment.

Indications

May be used for the management of moderate to heavy exuding, partial to full thickness wounds, including:

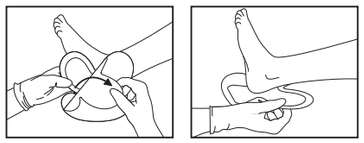
- Abrasion and lacerations
- Arterial, diabetic, and venous ulcers
- Pressure Injuries
- Traumatic wounds (e.g. Skin tears, road rash and minor injuries)
- Heel dressings may be used for prevention, as part of a pressure injury prevention protocol

Contraindications

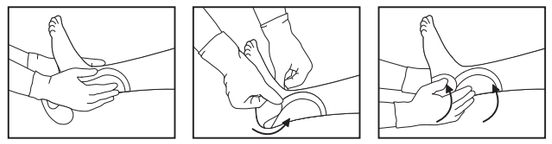
Third-degree burns and lesions with active vasculitis.

Directions

1. Clean wound area with appropriate wound cleanser. Dry surrounding skin thoroughly. Skin barrier products are not necessary.
2. Remove dressing from packaging. Do not stretch or cut the product. The dressing should be positioned with 2 top points of the "Y" being placed around the Achilles/ankle and bottom of the "Y" being placed under the heel.
3. Remove the center protective liner from the heel dressing.
4. Position dressing at the base of heel, and apply the adherent part of the dressing to posterior heel.
5. Remove one side of remaining protective liner from the upper Y-shaped portion of dressing and apply adherent part of dressing and smooth dressing against the skin of ankle. Repeat on the other side.



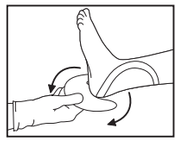
6. Remove the side of protective liner from the bottom portion of dressing. Apply and smooth upwards towards ankle. The adherent border may overlap the protective backing of the upper portion of the dressing. Repeat on the other side.



7. Press and smooth dressing throughout to ensure adherence to skin.
8. To apply a new dressing, repeat steps 1 – 7.

Directions for Removal

Carefully remove the Bordered Silicone Heel dressing by gently lifting the edges of the border of the skin.



Precautions and Observations

- Sterility is guaranteed unless package is damaged or opened prior to use.
- Single use only. Do not reuse.
- Should you observe irritation (reddening, inflammation), maceration (whitening of skin), hyper-granulation (excess tissue formation) or sensitivity (allergic reaction), consult a healthcare professional.
- In case of signs of clinical infection, consult a healthcare professional for adequate infection treatment.
- Do not use oxidizing agents such as hypochlorite solutions or hydrogen peroxide with this product.
- May be used under compression wraps/bandages.
- May NOT be cut to size.
- This product is not made with natural rubber latex.

Storage

- This product should be stored in dry conditions at room temperature.
- Sterile, do not use if inner packaging is damaged or opened prior to use. Do not re-sterilize.
