HALYARD®

XEROFORM
PETROLATUM
NON-ADHERING DRESSING

Description: A sterile, non-adherent protective dressing consisting of fine mesh absorbent gauze impregnated with USP White Petrolatum and 3% Bismuth Tribromophenate.

Indications: The dressings are used for open wounds such as lacerations, burns, circumcisions, surgical incisions and skin grafts.

Action: As a primary occlusive layer, it covers and protects wounds from environmental contamination while mildly deodorizing.

Contraindications:

1. Not for use on third degree burns unless approved by a physician in all cases.
2. Not intended for use on excessively draining wounds.
3. Not to be used on patients with hypersensitivity to Bismuth Tribromophenate.
4. Caution should be used if there is a history of atopy.

Warnings:

1. Do not use if unit package is opened or damaged.
2. Avoid multiple layers which may lead to maceration.
3. Discontinue use if irritation develops.
4. Avoid excessive packing and subsequent pressure on the wound.
5. Keep out of reach of children

Adverse Reactions: Irritation is rare but may develop in atopic patients or if sensitivity to Bismuth Tribromophenate exists.

Directions: Effective coverage is achieved with a single layer. A suitable absorbent secondary layer should be used to secure the Xeroform Petrolatum Dressing. Open foil packet by peeling edges down from arrow sufficiently to allow aseptic removal of the dressing with sterile forceps. To unfold dressing, grasp both ends with sterile forceps and pull apart or cut with sterile scissors to meet specific size requirements. For use outside a sterile environment, clean technique should be applied.

Ingredients: Fine Mesh, Absorbent Gauze Impregnated with 3% Xeroform (Bismuth Tribromophenate) in a Petrolatum Blend.

SKU code	Product Description	Case Qty
50197	HALYARD* Xeroform Petroleum Dressing, 5 in. x 9 in.	200
50198	HALYARD* Xeroform Petroleum Dressing, 2 in. x 2 in.	150
